Veterinary Ventures Introduces the New Drinkwell® 360°

- Multiple pet households no longer need to have water bowls throughout the kitchen; the Drinkwell® 360° offers five spouts of constant water flow at any angle-

(Reno, NV) – Veterinary Ventures, Inc. announced today its very latest addition to the growing line of widely popular Drinkwell® Pet Fountains. The Drinkwell® 360 Pet Fountain can provide up to five, patented free flowing water streams for multiple pet owning households.

Utilizing the same filtration technology as the Drinkwell® Original Pet Fountain, the Drinkwell® 360 constantly circulates the water which inhibits bacteria growth, keeping the water tasting fresh and appealing to pets. The new filter is unique to the Drinkwell® 360 with a cylindrical shape and a pull-tab for easy replacement.

The Drinkwell® 360 caters to multiple pet households, giving owners the ability to customize their fountain with the five interchangeable spout rings. Pets no longer have to wait their turn for a quick lap of water; they now can each have their own fresh flowing stream of water from any angle. By a simple turn, the flow control cap easily adjusts the intensity of the streams of water to match your pets' preference.

The pet fountain is completely dishwasher safe, except for the pump and holds one gallon of water at maximum capacity. Designed specifically for cats and small to medium sized dogs, the Drinkwell® 360 provides the constant hydration pets need and crave.

The Drinkwell® 360 will be available in January 2009, visit www.petfountain.com to find a full list of retailers.

The Original Drinkwell® was created by Veterinarian Dr. Mary Burns in 1995 to prevent her cat from drinking from the kitchen faucet. For more information about Veterinary Ventures, Inc. or its products, please visit www.petfountain.com.

- ### -

Founded in 1995 by Veterinarian Dr. Mary Burns, Drinkwell® The Original Pet Fountains, are the only pet fountains developed by a veterinarian. Veterinary Ventures, Inc, the manufacturer of the product, is dedicated to the development of health-related pet products for the convenience of pet owners and the well being of their pets.
